Domain Setup

Verify Domain ✓ | **TXT Method** | CNAME Method | HTML Method

Create a TXT record for your domain **sinaplus.ir** in your DNS provider as below:

Name / Host / Alias / TXT	Value / Points To / Destination
Blank or @ or sinaplus.ir	zoho-verification=zb40806211.zmverify.zoho.com

**Generic instructions for creating a TXT record for verification:**

You can create a TXT record for verification in your DNS Manager following the general instructions given below.

1. Log in to your account with your Domain registrar. (Your Domain's Administrative DNS Host).
2. Open your Domain Management Page to update the DNS Records (DNS Manager or DNS Control Pane or Advanced DNS editor).
3. Locate the option to add TXT records (Generally found under DNS Records, you can also consult the help page of your registrar in case you are not clear).
4. In the Name / Host / Alias / TXT, please leave it blank or add "@"
5. In the Value / Points To / Destination field add **zoho-verification=zb40806211.zmverify.zoho.com**

## Add users

You have now verified your domain. You can now proceed to add users and create their accounts for your organization. You can add users one by one, or use 'Import users' option to upload a CSV file to create the users.

To add users and create their accounts, click **Proceed to Add Users**. This will Launch the Add user page of the User Details section in the Control Panel. When you add users, you will create their individual accounts and provide passwords. The users can login to their accounts using the unique email address and their passwords.

If you are an Individual Professional and only user in the Organization, click Skip to proceed to the next step.
